

PROJECT CLOSING

Complete group lab work and upload in ulearn

As a team member *of the Artificial Intelligence (AI) project*, you will be developing the various project deliverables. One of them is closing project. All lessons learnt are consolidated and the team will seek acceptance of the completed deliverables from stakeholders. Project closing brings the project to an orderly end by preparing final report. Prepare the following report based on your AI Project:

1. Customer acceptance Project Completion Form
2. Lessons-Learned Report

CUSTOMER ACCEPTANCE/PROJECT COMPLETION FORM
18 JANUARY 2024

Project Name: Automotive Vehicles Engine Health Prediction

Project Manager: Kee Chin Yew

Name	Title	Signature	Date
Encik Amir bin Abdullah	Managing Director		19/01/2024
Puan Farah binti Ibrahim	Head of Finance and Administration		19/01/2024

Thank you for your input.

LESSONS-LEARNED REPORT
12 JANUARY 2023

Project Name: Automotive Vehicles Engine Health Prediction

Project Sponsor: Dr. Burhanuddin Mohd. Aboobaider

Project Manager: Kee Chin Yew

Project Dates: 20/01/2024

Final Budget: RM 260,000

a. Did the project meet scope, time and cost goals?

Yes

b. What was the success criteria listed in the project scope statement?

The model able to predict and classify the health engine condition of automotive engines.

c. Reflect on whether or not you met the project success criteria.

The finalised model able to predict the engine health through the hardware condition of the engine, and the accuracy of prediction is higher than 80%, hence our group is met the project success criteria.

d. What were the main lessons your team learned from this project?

The main lessons we learned from this project are understood the requirements to predict the engine health, development of neural network model, formal documentation of a project and skills to manage a project.
